

ServEase – Entrepreneurship Assignment
Technology Transfer, Policy & Professional Ethics (HUM-3101)
Assignment-02

1. Introduction

Entrepreneurship today operates in a rapidly evolving global environment shaped by digital transformation, competitive disruption, and customer-centric value systems. In Bangladesh, urbanization and technology adoption are increasing the demand for reliable, doorstep household and personal services. Responding to this growing need, ServEase is designed as a unified digital platform that connects customers with verified service professionals across multiple domains, ensuring convenience, trust, and transparency.

2. Entrepreneurship Challenges

2.1 Global Challenges

- Technological Disruption. Automation, platforms & AI demand continuous innovation.
- Changing Customer Behavior, Instant services, secure digital payments, real-time feedback.
- Workforce Upskilling, Maintaining quality in gig-economy workforce.
- Cybersecurity & Data Privacy, Protecting data & transactions.

2.2 Local Challenges (Bangladesh Context)

- Informal Labor Market, Untrained service workers require trust-building.
- Digital Literacy Gap, Varying adoption of online booking & payments.
- Urban Constraints, Traffic & logistics impact timely service delivery.
- Cultural Trust Barriers, Preference for known technicians over online booking.
- Regulatory Compliance. Legal registration, taxation, worker safety rules.

3. Business Process Development

3.1 Concept and Planning

ServEase provides verified professionals for personal care, home maintenance, IT support, event services, and vehicle care through a digital platform, ensuring trust and service availability.

Key planning components:

- Market research on service demand in cities
- Partner onboarding & verification
- Quality-standards & service training

3.2 Operational Workflow

Stage	Description
Customer Request	Book through app/web
Service Matching	Nearest verified provider assigned
Confirmation & Pricing	Transparent price & time estimate
On-Site Service	Service delivered at customer's location
Review & Payment	Digital payment & rating system

3.3 Resource Requirements

- Mobile App & Website
- Customer support desk
- Verification team
- Training & onboarding unit
- Payment gateway integration

4. Marketing & Communication Strategy

4.1 Target Segments

- Urban households
- Working professionals & students

- Small offices & rentals

4.2 Marketing Approach

Method	Strategy
Digital Marketing	Facebook/Instagram campaigns, Google SEO
Referral Programs	Discounts for referrals
Partnerships	Appliance stores, salons, hostels
Trust-Building	Service warranty, verified badges

4.3 Communication Strategy

- Focus on trust, speed & verified skilled workers
- Marketing theme: “Reliable services at your doorstep — anytime, anywhere”
- Educational content for users (safety & maintenance tips)

5. Deployment Process

Phase-Wise Roll-Out:

- Phase-1 Prototype app + limited services
- Phase-2 Launch in Major Cities (Dhaka, Chattogram, Sylhet)
- Phase-3 Workforce training & certification
- Phase-4 Nationwide expansion + premium plans
- Phase-5 AI-enabled prediction & automation

Technology Deployment:

- Cloud-based backend
- Secure digital payment gateway
- Data-driven improvement model

Ethical & Regulatory Considerations:

- Worker ID verification & background checks
- Fair compensation & training
- Consumer privacy & data compliance

6. Conclusion

ServEase reflects a modern solution to Bangladesh's evolving urban needs by offering secure, convenient, and verified on-demand home services. With structured planning, ethical workforce practices, and phased technology deployment, ServEase can become a trusted nationwide service ecosystem, lastly generating employment and improving daily life convenience.
