

1. Define entrepreneurship. Mention the global and local challenges of being an entrepreneur. (1 + 3)

Entrepreneurship is the process of identifying opportunities, taking risks, and organizing resources to create and run a new business or innovation with the aim of earning profit and creating value.

Challenges of being an entrepreneur:

Global challenges:

- High market competition at international level
- Rapid technological changes
- Access to global funding and investment
- Economic uncertainty and inflation

Local challenges:

- Limited access to capital and loans
 - Complex government regulations and bureaucracy
 - Lack of skilled manpower and infrastructure
 - Social risk and fear of business failure
-

2. Shortly describe patent and intellectual property rights with proper examples. (4)

A patent is a legal right granted by the government to an inventor that gives exclusive rights to make, use, or sell an invention for a specific period (usually 20 years).

Example:

A company invents a new type of solar panel and patents the technology to prevent others from copying it.

Intellectual Property Rights (IPR) are legal protections given to creators for their intellectual creations such as inventions, software, designs, trademarks, and literary works.

Examples of IPR:

- Copyright for software or books
- Trademark for brand names or logos
- Patent for inventions

IPR encourages innovation by protecting creators' rights and economic interests.

3. Mention the importance of marketing and communication strategies for successful business model implementation. (2)

Marketing and communication strategies are important because they:

- **Create customer awareness and promote products or services**
- **Help understand customer needs and market demand**
- **Build brand image and customer trust**
- **Support sales growth and long-term business sustainability**

Effective communication ensures that the business value proposition reaches the right audience.
